SUMMARY

Software Engineer with 1 year of professional experience in designing, developing, testing, and deploying web and software applications across the Software Development Life Cycle (SDLC). Strong foundation in software engineering, Object-Oriented Programming (OOP), clean code, software architecture, debugging, and problem solving. Experienced in full-stack development using Java, Python, PHP, JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, Spring Boot, FastAPI, and RESTful APIs, with database experience in MySQL, SQL Server, PostgreSQL, and Firebase. Skilled in developing responsive, secure, and user-friendly applications with UI/UX design, JWT and OAuth authentication, payment gateway integration, and third-party APIs. Experienced in AI application development using Google Gemini, OpenAI, and Claude APIs, including AI chatbots, automation, RAG, LangChain, prompt engineering, and ML integration. Familiar with Android and Flutter development, Agile methodologies, software testing, and modern development practices.

WORK EXPERIENCE

Software Engineer - Alpha Finance (Batticaloa, Sri Lanka) | Full-time, Remote **May 2025 - May 2026**

- Developed and maintained web applications using Laravel PHP.
- Designed and maintained backend functionality, business logic, and application modules.
- Designed and managed MySQL databases, including tables, relationships, queries, and data operations.
- Developed CRUD operations, data processing functions, and form validation.
- Developed and integrated RESTful APIs and connected frontend components with backend services.
- Implemented WebSocket-based real-time functionality for dynamic system updates and communication.
- Designed responsive and user-friendly UI/UX interfaces, focusing on usability and overall user experience.
- Troubleshot technical issues, identified application errors, and implemented effective solutions.
- Optimized application performance and database queries to improve system efficiency and reliability.
- Tested application functionality and resolved bugs during development and testing.

PROJECT EXPERIENCE

BIKE BUDDY.LK – AI-Powered Motorcycle Service Management System

- Developed a centralized AI-powered motorcycle service management system connecting bike owners, service centres, bike sale shops, and spare-parts vendors through a unified digital platform.
- Implemented core modules including online service booking, shop discovery, bike sales, spare-parts management, digital service tracking, notifications, and reporting, with role-based features for customers, shop owners, and administrators.
- Integrated AI-powered smart search with spelling correction and intelligent recommendations, along with Google Maps API for location-based shop discovery and service navigation.
- Developed a responsive web application using Next.js, React.js, HTML5, CSS3, JavaScript, Firebase, and Firestore, implementing secure authentication, API integration, and optimized application workflows for reliable system performance.

UniManage – University Management System

- Developed a university management platform with 7+ academic and administrative modules, including student management, courses, enrollment, attendance, notifications, and payments.
- Implemented secure authentication, role-based access control, online payments, and administrative dashboards, streamlining core university operations.
- Optimized relational database structures, SQL queries, and application workflows, improving data retrieval performance by approximately 20%.

Travel AI Chatbot

- Developed an AI-powered tourism platform with 5+ intelligent travel features including conversational assistance, itinerary planning, and destination recommendations.
- Integrated Google Gemini API to provide personalized AI-powered travel assistance and conversational user experiences.
- Implemented 3 subscription tiers, payment processing, user account management, and responsive web interfaces for a scalable SaaS-style platform.
- Optimized frontend and backend workflows, improving application responsiveness and user interaction efficiency by approximately 20%

TECHNICAL SKILLS

- **Programming Languages:** Java | Python | PHP | JavaScript | TypeScript | SQL
- **Frontend Development:** HTML5 | CSS3 | React.js | Next.js | Bootstrap | Tailwind CSS | Context API | Redux
- **Backend Development:** Laravel | Node.js| PHP | CodeIgniter | Express.js | Spring Boot FastAPI | REST APIs
- **Mobile Development:** Java Android | Flutter | ML Kit
- **AI & Machine Learning:** Google Gemini API | OpenAI API | Claude API | AI Chatbots | AI Automation | Prompt Engineering | ML Integration | RAG | LangChain | Ollama | Hugging Face | n8n
- **Databases:** MySQL | Microsoft SQL Server | PostgreSQL | Firebase
- **UI/UX & Design:** Figma | Canva | Wireframing | Prototyping | Responsive UI Design | User-Centered Design | UI Design
- **Tools & Platforms:** Git | GitHub | GitLab | Visual Studio | VS Code | Android Studio | Postman | Composer | Docker | GitHub Actions
- **Other Skills:** SDLC | Agile/Scrum | Software Testing | Unit Testing | Clean Code Principles | JWT Authentication | OAuth | Payment Gateway Integration

---

SOFT SKILLS

- Problem Solving & Analytical Thinking
- Software Design & Technical Decision Making
- Communication & Team Collaboration
- Time Management & Project Planning
- Adaptability & Continuous Learning
- UI/UX Design & User-Centered Thinking
- Attention to Detail
- Creativity & Innovation
- Self-Motivation & Independent Working

EDUCATION

BEng (Hons) Software Engineering

- London Metropolitan University

2025 - 2026

Higher National Dipoloma in Computing (Software Engineering)

- Esoft Metro Campus

2023 - 2025

Professional Diploma in Engilsh

- Esoft Metro Campus

2023 - 2024

LANGUAGES

- English (Fluent)
- Tamil (Native)
